

GREENLINE SERIES

Single Phase Unit 3 KVA

On-line protection for Computer Servers

The Green Line Series is the mighty turbo in the single phase ONLINE family of uninterruptible power supplies by UNILINE Energy. The Green Line Series provides reliable & dependable protection to high-end applications and is extensively equipped to master all eventualities & contingencies.

Green Line Series :

- True on-line DSP based double conversion technology with Integrated Static Bypass mechanism.
- In normal operation, the Green Line Series converts the mains AC voltage into DC voltage which supplies a battery and an inverter with energy.
- The inverter generates a sine wave AC voltage which is permanently available at the output.
- If and when power problems strike, the battery delivers the required power to the inverter.
- The additional Bypass system integrated into the UPS device guarantees an unprecedented level of power supply security.
- In overload conditions the Bypass system automatically switches mains power directly through to the user.
- The module design improves reliability of the UPS, also simplifies service maintenance
